PEOPLE FIRST

You are in for a  
**life-changing**  
experience

Chances are, if you are reading this you are looking to upgrade your existing hearing aids or contemplating buying them for the first time. Either way, you are taking action to improve your hearing.

A hearing loss is like any other important health-related issue: the sooner it is treated, the better the outcome.

Treating hearing loss is proven to have a positive impact on quality of life. In addition to helping you hear better, it can help you feel better.

A great hearing solution is one that will give you clear speech understanding, ensure you don't feel tired at the end of the day and deliver sound that sounds natural to you.

Many people describe their first experience with hearing aids as life-changing.

It's your  
**brain that hears.**  
Not your ears.

### Oticon's new BrainHearing™ Technology

The ears receive sounds and send them to the brain that translates the sounds into meaning. You don't hear with the ears, you hear with the brain. When you have a hearing loss, your ears have difficulty picking up sounds and your brain tries to fill in the gaps.

I wi\_\_ \_ot be at \_ome \_efore 9 \_m.

Even with your brain working hard, it can be incredibly difficult, not to mention exhausting, to keep up with and participate in what is going on around you.

### The New Big Thing - BrainHearing™ technology can help the brain make sense of sound

Oticon hearing aids feature BrainHearing technology, designed to support your brain and help it make sense of sound, with less effort. For you, this means keeping up with fast-flowing conversation between friends, family and colleagues will be easier and more enjoyable.

The partnership between your ears, brain and hearing aids is fundamental to Oticon and is unrivaled in the hearing care industry.

# Your best decision. Ever.

Oticon Alta2 are **premium** hearing aids that offers **the most personalisation options**. Alta2 includes the **complete set of Oticon's BrainHearing™ technologies**: Speech Guard E, Spatial Sound, Free Focus and YouMatic. These work together to offer you the best sound quality available and access to the widest range of sound and speech details. Additionally the **Soft Speech Booster** in Alta2 gives you a better understanding of soft speech and subtle sounds.

So, whether in noisy environments or in quiet, private moments, Alta2 gives you the best opportunity to participate in the ping-pong of conversation with the least amount of effort.

**Once you try Alta2, you will hear why we recommend Alta2 to those who want the very best.**

## Premium BrainHearing™ instruments.

### ✓ Optimised to your personal preferences

Ordinary hearing aids assume the same settings work for everyone. But no two people want to hear sounds the same way. This is because our brains interpret sounds differently. YouMatic in your Alta2 can be tailored to your personal listening preferences to give you the most satisfying and natural listening experience.

PERSONALISED WITH **YOUTOMATIC**

### ✓ Zoom in on what's important

With the Free Focus feature, your Alta2 hearing aids will zoom in on the sounds you want to hear, even as you move from walking to entering a meeting or social gathering. While you focus on speech, you will still receive valuable background sound information so you can switch focus if needed.

ZOOM IN WITH **FREE FOCUS**

### ✓ Super fast location of sound sources

Spatial Sound in Alta2 supports your brain's natural ability to sense where sounds are coming from, which helps you know where to focus attention and do things like safely crossing the road.

SOUND DIRECTION WITH **SPATIAL SOUND**

### ✓ Superb speech recognition

The Speech Guard E feature in Alta2 protects speech clarity and details to easily let your brain comprehend what is being said – even in noisy environments.

SPEECH PROTECTION WITH **SPEECH GUARD**

Discreet and **easy control**  
of your hearing aids

With the Oticon remote control, you will have complete control of your hearing aids. It allows you to adjust the volume or switch listening programs without touching the hearing aids. The remote control works with all Oticon hearing instruments including the tiny IIC and designRITE models.

## Connectline devices

The easy way to  
**stay connected**  
and **hear better**

With Oticon ConnectLine you can get the most out of your Oticon hearing instruments in more situations. ConnectLine will help you experience better connections when interacting with other people, when you seek or get information and when you want to be entertained.

### What is ConnectLine?

ConnectLine is a series of devices that help you connect to a wide variety of communication and entertainment applications - transforming your hearing instruments into a personal wireless headset.

## Relief from **Tinnitus**

### Do you experience tinnitus?

Many people experience tinnitus as a ringing or buzzing in their head. Alta2 Pro Ti hearing aids feature customisable sound stimuli, including soothing ocean sounds. By adding sound, the contrast between the tinnitus and the environment can make tinnitus less noticeable. Ask your hearing care professional about Alta2's tinnitus control capabilities.

## People First

People First is our promise to empower people to communicate freely, interact naturally and participate actively
